**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In applicant's specification, they denote the "station module" as element 1 on page 3 of the spec and as element 10 on page 5 of the spec. Correction is required as to which element is actually the station module. Applicant also denotes element 1 on page 4 of the spec as a "phone-utility" interface.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's claim 1 ends with a colon, and every claim sentence must end in a period. Correction is required. In the second paragraph of claim 2, "the" should not be capitalized. In claims 3-5, applicant's recitation of "recited above" needs to be changed to reflect what claim in particular applicant is referring to. Claim 1 is indefinite because applicant has claimed that the station module (1) access 2 telephone lines. These 2 claimed telephone lines are not shown on the drawings. Everything claimed needs to be shown on the drawings. Therefore the 2 telephone lines should be shown accessing the station module.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2645

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 as understood are rejected under 35 U.S.C. 102(e) as being anticipated by Cohen et al '861.

Cohen shows in Fig. 2A a station module (221) that provides access to 2 telephone lines (twisted pair 222). Cohen et al DSL modem (220-Fig. 2A) indicates presence of an Ethernet-type port, as shown by end-station 210 that consists of a desk top PC with an Ethernet Network Interface card (214).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cohen '595 and Rogers
